

Michigan Math Club

MCAIM
Series on
Algorithm
Startups

Thursday at 4pm in **EH4448**
Pizza + pop outside afterwards!!

A conversation with Olivia Walch

09 November 2023

Olivia Walch
CEO of Arcascope

Olivia earned her PhD
in Applied Math from
U(M) in 2016.
She also designed the
Department's voting
t-shirts!!!

Many do not realize the potential of mathematical and algorithmic ideas to have a societal impact through the commercial space. Mathematicians often receive advice tailored for other areas, such as building physical objects, consulting, or general software development, that may not apply. Additionally, startups with sophisticated mathematical, statistical, or engineering algorithms may encounter unique problems. In this new colloquium series, startup CEOs will discuss the story of their companies from seed to IPO stages and offer advice on building successful businesses based on mathematics or algorithms.
