

We're POOL4TOOL, a global leader in eProcurement. POOL4TOOL has specialized in the integration of client and supplier processes based on the cloud solution, as well as consulting and development services in eBusiness and SAP environments. This is why we offer a work culture where ideas are free to fly. And that's pretty inspiring. Because when you and 100 diverse global minds innovate together, you can change the world.

Our **Sourcing Suite** provides all important modules to optimize procurement processes. The **Collaboration Suite** is a virtual project room in which all documents can be administrated and exchanged. Such documents can include cost breakdowns, R&D data, specification sheets, project plans and meeting minutes. Thus, geographically separated business partners in different units — such as the project manager, construction and design partners, suppliers and manufacturers, sales partners and clients — are able to work on the same project.

We serve international clients like Carl Zeiss, Miele, Modine, Bayer and Stihl. We are looking for help in our office in **Farmington Hills, Michigan**:

Cloud Computing/Customizing Intern

Role Summary/Purpose

The Cloud Computing/Customizing Intern will assist the project manager in execution and customization of the POOL4TOOL products to our clients. The ideal candidate will have an in-depth understanding of web-based software and HTML coding. Preference will be given to candidates who have programming experience. This is a paid position.
